1. My Short-Term Goals

1. I want to improve my Excel and computer skills so that I can use them confidently.
2. I want to complete my final-year studies with good marks.
3. I want to improve my communication skills and become more confident while speaking in front of others.

2. My Long-Term Goals

1. I want to get a good job in a project management or management-related field.
2. I want to become financially independent and build a successful career.

3. One SMART Goal

My goal is to improve my Excel skills within the next 3 months so that I can use Excel easily in my future job.

- S – Specific: I will learn Excel formulas, PivotTables, charts and basic data analysis.
- M – Measurable: I will practise Excel regularly and complete at least 3 tasks every week.
- A – Achievable: I will spend 30 minutes daily learning and practising.
- R – Relevant: Excel is an important skill for my future career.
- T – Time-bound: I will try to complete this goal within 3 months.

4. Action Steps to Achieve My Goals

1. Make a proper daily schedule and follow it.
2. Practise Excel and other computer skills regularly.
3. Improve my English by speaking with others.
4. Complete my college work and projects on time.
5. Prepare a good resume and start applying for internships.
6. Learn new skills through online courses.
7. Work on my confidence and communication skills.
8. Stay focused and keep working towards my goals.
